

1) Acknowledge that you have read the syllabus by stating this as your answer to this question

I have read the syllabus

2) Did you notice anything interesting in the course schedule? If so, why does it interest you?

Queues. Java was my first programming language (used in both app development and robotics) and I have never seen them.

3) What is an object as it pertains to Computer Science?

An instance of a class. They can contain both data and/or methods.

4) Github repo

https://github.com/NoahLacks63/UMO_COS225/tree/main/Homework0
